The organization for people with neuropsychiatric disabilities, their families, professionals and other interested parties.

Attention – for better conditions.

Everyone should get the right support:

- In school.
- At work.
- During free time.

With information and knowledge, we increase the understanding of people who have NPF.

Our most important tasks:

- To create support groups.
- To increase understanding of people with NPF through information and education.
- Early detection and proper investigation, support and treatment.
- The right to education and work.
- Clearer rights under the law.
- Research and method development.
- To convey the results of medical, psychological and educational research.

Knowledge makes a difference!

- We are a local association that works to ensure that everyone with NPF in Värmland gets the support they need.
- Together we become stronger and can fight together for the rights for children and adults in society.
- The association is in dialogue with the municipal and county council politicians and civil servants.
- We all have different experiences and knowledge that are important in these meetings.
- We have a lot to learn from each other.
- We can support each other in difficult situations.

Together we are strong!

Events can be found on our homepage and Facebook page.
